To,
 Prime Minister of India,
 152, South Block, Raisina Hill,
 New Delhi-110011

SUB: SWACH BHARAT ABHIYAN-NEXT GEN

Dear Prime Minister Sir,

BACKGROUND: A few years back when my son was in Class 1 say "No to Fire Crackers" was propagated by the teachers in his school due to the harm it causes to the environment. Now though he is 8th Class he has not burnt any crackers over the last 7 years. This was a revelation to me that such education in the early years of a student's life has such profound effect.

Thus with this background the Swach Bharat as a subject should be introduced for children from Class 1 to Class 12.

Objective of this subject will be steps to increase the awareness of how to improve the environment.

No to smoking, no to Tobacco, use of CFL/LED lights, No to burning of leaves, No to cutting of trees, No spitting on Road, No urinating on the Road, Behavior towards Women, What are NGO's, If possible in case any NGO is active in the vicinity of the school then to incorporate its case study as part of the curriculum, etc

Class 8 to Class 12 to go out once a week to check and clean the area around the school. Class 8 to keep clean a radius of 50 meters around the school. Class 9 75 meters and Class 10 100 meters and Class 12 200 meters. Thus once the general public observes school children out on the road cleaning the roads, slums, markets or colonies around the school it will have a profound effect. Moreover our upcoming generation will imbibe excellent habits which are lost to the present generation.

Yours Truly,

 (Gurpreet Singh Chawla)
